

Now Offering Medication Management Services

at Erie Outpatient Treatment Center

Now an integral part of Erie Outpatient Treatment Centers' comprehensive treatment model, Medication Management Services are designed for adults receiving substance use treatment at our program who can benefit from psychotropic medications, including antidepressants or anti-anxiety medications, commonly used to manage symptoms of mental health disorders, such as anxiety and depression.

Services Include:

- » Initiate medications for new clients
- » Provide continuation of ongoing medications
- » Ensure clients are following their medication regimen
- » Monitor dosage and efficacy of medications
- » Develop an individualized plan of care in conjunction with clients and other behavioral health professionals
