

Philipsburg and Bellefonte Outpatient Treatment Centers Now Offer Sublocade®

What is Sublocade®?

Sublocade® is a prescription medication used to treat adults with moderate to severe opiate use disorder. Sublocade® is an injectable form of buprenorphine that lasts up to 30 days. Individuals should be on a stable oral dose of the medication for at least 7 days prior to receiving their first injection.

Sublocade® is part of a complete treatment plan that includes counseling at Quest Services.
